

ABSTRACT

Compositions are provided for delivery of a biologically active agent to a cell, comprising a vehicle having the formula:

5 $A - (BC)$

wherein:

A is a lipid-based vehicle;

B is a moiety comprising an internalizing peptide;

C is a moiety comprising a biologically active agent;

10 (BC) is a complex comprising B and C in which B is conjugated to C; and,

A is conjugated to (BC).
